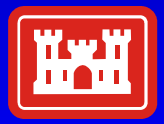
Installations as Home Station Operations Centers

EQ/I Workshop

Champaign, Illinois

March 16-17, 2004



Home Station Operations Center

HSOC Concept

- Installations as *flagships*
- *Home Station* for a Joint and Expeditionary Force
- Battle Command assets
- Global Information Grid
- Selected Installations

What's Different?

	Current	Future
Network Connectivity	• **Mostly used for administrative purposes**	• **Part of combatant Global Information Grid.** • **Ultra-high bandwidth and reliability req.**
Installation Security	• **Far from the front.** • **Terrorist threat demonstrated**	• **High value target** • **Asymmetrical threat** • **New CBRNE? Threats** • **Critical Infrastructure**
Facility Infrastructure Requirements	• **Requirements evolve slowly** • **Rigid Division/ Brigade structure**	• **24/7 Command Post** • **Modular Force Structure with embedded assets** • **Facilities adapt to**

Functional Areas

- Current / future operations area
- Plans area
- Expansion area
- Commander facility
- Billeting area

One possible configuration
